

NOTICE OF PUBLIC COMMENT PERIOD AND PUBLIC MEETING

**ConocoPhillips Company
San Francisco Refinery
Rodeo, California
Draft Closure Plan and Draft Post-Closure Permit**

Public Comment Period: August 25 thru October 14, 2011

What Is Being Proposed?

The Department of Toxic Substances Control (DTSC) invites you to comments on a draft Closure Plan and draft Post-Closure Permit for the Primary Basin at the ConocoPhillips Company, San Francisco Refinery, located at 1380 San Pablo Avenue, Rodeo, California. DTSC is the State agency responsible for regulating the generation, storage, treatment, and disposal of hazardous waste in California.

If approved, the Closure Plan approval and the 10-year Post-Closure Permit would allow the facility to close the Primary Basin and retrofit it with a synthetic liner system comprised of an XR-5 Geomembrane top liner and underlying leachate collection/leak detection geogrid drainage net and would require long-term monitoring and maintenance of the Primary Basin.

As part of the permit process, DTSC has performed a review of the proposed Closure Plan and draft Post-Closure permit as required by the California Environmental Quality Act (CEQA). Based on this review, DTSC has determined that the proposed closure plan approval and the draft Post Closure Permit will not have any significant adverse effects on public health or the environment. DTSC proposes to issue a CEQA Notice of Exemption in connection with this project.

The public comment period begins August 25 and ends on October 14, 2011. Written comments or questions may be postmarked or emailed by **October 14, 2011**:
